# MOLDURAS EXTERNAS ESPECIAL GART

EPS revestido com manta de poliéster e massa cimentícia

Molduras de poliestireno revestidas com manta de poliéster e resina acrílica com base cimentícia. Fabricação conforme projeto.

Por serem muito leves, proporcionam menor carga na estrutura da obra. A instalação é feita com cimento cola AC II sem necessidade de fixação mecânica. Produto testado e certificado pelo Laboratório Falcão Bauer com 5 anos de garantia, instalação fácil e rápida.

A aplicação pode ser feita sobre superfícies planas sem nenhum tipo de revestimento. Instalação direta em bloco cerâmico, vigas, pilares e lajes de concreto, emboço e estruturas metálicas.

Para o acabamento, pode ser utilizado qualquer tipo de revestimento: tinta, textura e/ou massas para uso externo.
